Software development: Python, PHP, Java, C, VB.NET, HTML, CSS, JavaScript; React, Node.js and FastAPI; application testing, debugging and troubleshooting.

Data analytics & BI: SQL, Python, Microsoft Excel (intermediate), Power BI (basic), data analysis, visualization fundamentals and predictive analytics concepts.

Database management: MySQL, PostgreSQL, relational database concepts, database design, data organization and SQL queries.

AI & emerging technology: AI and machine-learning concepts; practical AI-assisted coding, research and problem-solving; use of AI agents for multi-step tasks.

IT systems & support: Windows and Linux fundamentals, computer troubleshooting, networking fundamentals, technical documentation and systems testing.

PROFESSIONAL DIGITAL TOOLS & TECHNOLOGIES

Development & version control: Visual Studio Code (VS Code), XAMPP, Git and GitHub.

AI tools: ChatGPT, GitHub Copilot, Claude, Google Gemini, Microsoft Copilot and other AI-powered tools.

Productivity: Microsoft Word, Excel and PowerPoint.

PROFESSIONAL EXPERIENCE

Customer Experience Intern

Airtel Rwanda | December 2025 – April 2026

- Supported Mobile Number Portability (MNP) activities, including port-in/port-out processes, eligibility checks, cooling-off procedures and port reversals.
- Participated in User Acceptance Testing (UAT) and end-to-end system testing; identified, documented and reported defects and operational issues.
- Gained exposure to telecommunications systems and coordination involving Airtel, CCH and other industry stakeholders.
- Developed working familiarity with post-porting activation, HLR, network routing, billing, charging and value-added services.

Part-Time Guard & Household Assistant

Tanzania High Commission | Kigali, Rwanda | October 2022 – Present

- Provide security and household assistance in support of a staff member of the Tanzania High Commission.
- Help maintain a safe, secure and organized environment while supporting day-to-day household responsibilities.
- Demonstrate discretion, reliability, punctuality and professionalism while balancing employment with academic commitments.

TECHNICAL PROJECTS

Kibaza Rwanda Heritage System – Web-Based Genealogy & Digital Archive

- Academic project focused on digitally preserving Rwandan family histories, genealogical information and cultural heritage.

- Developed with PHP, MySQL, HTML, CSS and JavaScript; includes role-based access for administrators, elders and youth archivists.
- Worked on family relationship structures and recursive family-tree functionality.

Customer Churn Analytics System

- Predictive analytics project intended to identify customers at risk of leaving and support customer-retention decisions.
- Technology stack: Python, FastAPI, React, PostgreSQL, XGBoost and SHAP.

LEADERSHIP & ENGAGEMENT

President – Communauté des Étudiants Pentecôtistes, University of Kigali (CEP-UoK)

- Provide leadership and coordinate fellowship activities, teams, events and stakeholder relationships.
- Support communication, collaboration, organizational planning and community outreach.
